# Law for Tomorrow's World™

@jamesheen

20171015

---

---

**legaltech + blockchain**

---

---

with fintech puzzle piece

---

---

# A Shadow World

A kind of virtual reality, is not in your eyes or ears, but is a set of records and operations which represents the real world. Your identities, asset records, transactions, and even more.

---

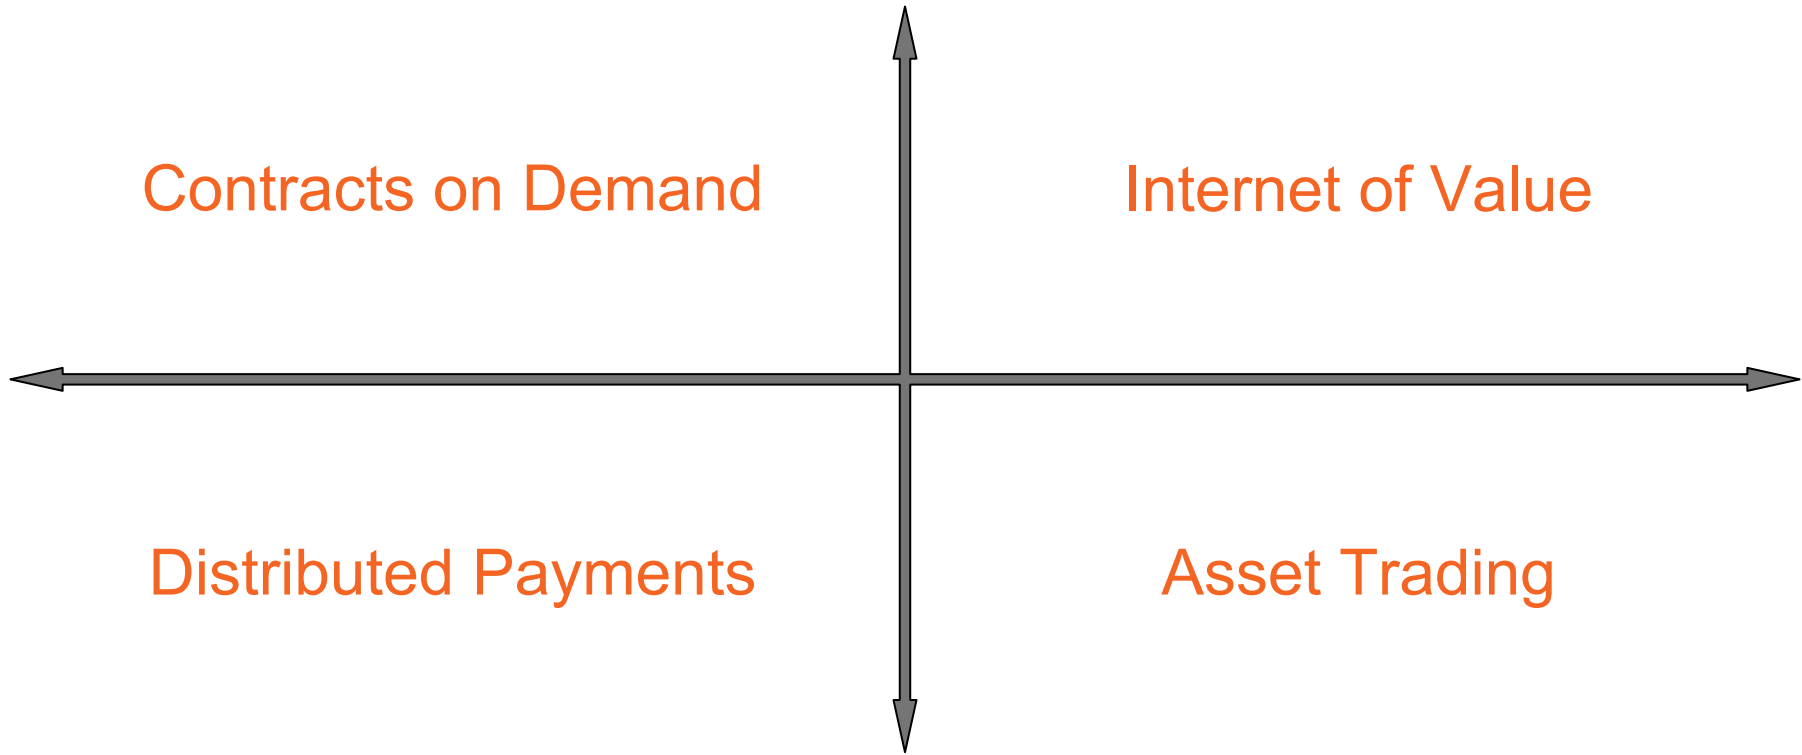

# Legaltech, Fintech, and Blockchain

Like the real world, it's not possible to get rid of law and finance to operate, which is brought by legaltech and fintech. The blockchain technology is as the foundation to engineer it.

---

# Internet of Value

The first time value is streaming on the internet, along with data and information, since the internet was invented decades ago.

---

---

# Internet of Value

- Value streaming along with the data stream.
  - At both machine-to-machine and human levels.
  - Smart contracts applied.
  - The destination more than internet of things/everything.
-

---

# Contracts on Demand

- Draft, review, negotiate, consult, and sign the contracts online.
  - Identity authentication required.
  - Agreements at human level corresponding to smart contracts at machine-to-machine level.
-

---

---

# Distributed Payments

- Fiat currencies rather than cryptocurrencies.
  - A significant puzzle piece to value streaming.
  - Distributed community and ecosystem.
-

---

---

# Asset Trading

- Asset categories can be widely extended.
  - With identity authentication.
  - Trading at fiat currencies.
  - Fiat-based digital assets.
-

---

# To be continued..
